EXPERIENCE

Intellectify.io

Jan 2026 – Mar 2026

Software Engineer Intern

Remote

- Contributed to multiple production web platforms in the company's portfolio — [intellectify.io](#) (a mentor-matching platform for paid 1:1 sessions), [arektakichu.com](#), and [arektabo.com](#) — working across frontend pages and admin-side features.
- Built admin panel modules including a **cash management interface** and product/order views, using React + Django on arektakichu.com.
- Worked alongside senior engineers through Git/GitHub PR workflows; gained practical exposure to production deployment using Docker, AWS, pm2, and Gunicorn.

EchoLogyx Ltd.

Sep 2025 – Nov 2025

Industrial Attachment, AI Product Team

Hybrid

- Contributed to **Echointerview**, an AI-powered recruitment SaaS, as part of a team building Next.js interview-flow components and candidate-side UI.
- Collaborated with the AI product team on LLM-integrated evaluation features; participated in A/B testing and product iteration cycles.
- Gained hands-on exposure to real-world deployment, testing, and cross-functional collaboration workflows used in an AI product team.

PROJECTS

Online Judge | React, Node.js, PostgreSQL, Redis, Docker

[GitHub](#)

- Built a full-stack competitive programming judge supporting multi-language code submission with sandboxed Docker container execution for secure, isolated evaluation.
- Implemented **Redis-based job queuing** for asynchronous submission processing, with PostgreSQL persisting problems, submissions, verdicts, and user data.
- Designed REST APIs and a React frontend with real-time verdict feedback; orchestrated all services via Docker Compose for consistent dev/prod environments.

EchoChat | React, Node.js, Express.js, WebSockets, PostgreSQL, JWT

[GitHub](#)

- Developed a real-time chat application with WebSocket messaging, JWT authentication, and PostgreSQL persistence; designed secure REST APIs with proper access control.
